

## Mountain Flying

Flying in mountainous areas is challenging, not only because operational altitudes and winds are higher, but also because weather reporting and off airport landing opportunities are fewer than in other flight environments. This seminar, prepared by the Colorado Pilots' Association, acquaints pilots with the challenges of mountain flying and offers suggestions for training and additional information. It is informational only and in no way prepares inexperienced pilots for flying in mountainous environments.

**Directions:** The EAA clubhouse shares a building with REGION FLYERS on the south side of the field. Those driving in will find parking around the building. Those flying in may park on the ramp to the north of the building.

### A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.
